

20. Lab Course on EM in Infectious Diseases

22./23.04.2013, Robert Koch Institute, Berlin

Center for Biological Security 4, Head: Dr. Michael Laue

The lab course will deliver hands-on information on different aspects of bio-medical electron microscopy. We offer three different modules in parallel:

- Diagnostic negative staining EM of microorganisms (Beginner level)
- Immuno-EM (Advanced level)
- Ultrathin section EM (Ultramicrotomy) (Beginner level)

Participants should select one of these modules while registering for the course. We expect that participants have a basic knowledge on transmission electron microscopy and provide a perspective for using EM in future.

If you have any questions regarding the course please contact us for further information.

Fees (including lunch):

Regular: 50 €

Student: 25 €

DGE-Member: free

Registration:
